BEATRIZ PEREIRA

Entry-Level Frontend Developer

BP brp99.github.io ✉ bp111199@gmail.com 🔗 beatriz-pereira-dev ⬡ BRp99 📍 Portugal

ABOUT ME

Hi, I'm Beatriz. During the final stages of my Master thesis in Sports Science, I got very interested in Computer Science. In January 2023, I handed in my Master thesis and started my self-taught journey into Programming.

I built several undocumented projects in Javascript that served to explore fundamental programming concepts like simple math and taxes calculators. Then I moved on to frontend development: I built the classical To Do List, a Hangman Game, and a few others.

A few months in, I started learning React with Typescript, and built an e-commerce app with a placeholder backend API, and my portfolio.

I'm currently looking for an entry-level industry position in frontend development. In the meantime, I'm honing my Python programming skills with Advent of Code 2023, Web Scraping and learning Cypress.
